SUMMARY

I'm a software engineer specializing in platform integration and automation. I connect products to the services they depend on and automate the work in between.

EXPERIENCE

Software Engineer · Nyntax Nov 2024 – Present

Integrations, automation and AI features for the agency's client SaaS products.

- Built compliance automation across 40+ platforms for a Y Combinator-backed client (SOC 2, HIPAA, GDPR, PCI DSS), shipping on fast-moving deadlines with its US startup team and picking up unfamiliar platforms quickly.
- Built and maintained features across the agency's other client SaaS products on web and mobile, including AI-powered features, payment integrations and workflow automation.
- Built internal automation and web-scraping tools that replaced manual research with repeatable data pipelines for the agency's business development.

TypeScript · Go · Node.js · Next.js · React · React Native · Puppeteer · Computer-using agents (CUA) · OAuth

Freelance Software Engineer · Self-employed Sep 2021 – Present

Specializing in platform integration and automation for clients worldwide.

- Delivered web and mobile products for 20+ clients, from Figma designs to production releases on iOS, Android and the web.
- Shipped apps live on the App Store and Google Play, including Panoply Learning, a reel-style course platform, and Refindz, a collectors' marketplace.
- Built integrations and backend automation connecting client apps to third-party services, payments and admin dashboards.
- Owned projects end to end: scoping with clients, building, shipping and maintaining them after launch.
